AG 1011

ABOUT **AGGRANITE™** **Quartz Engineered Stone**

Aggranite Quartz Engineered Stone is a line of engineered stone that combines the beauty of nature with the durability of science.

Colors & Designs

At Midwest Tile, not only do we have the premier selection of colors and designs, Aggranite quartz engineered stone line gives us the ability to further customize your design project.

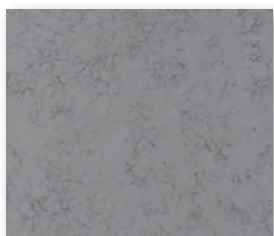

The Stronger Stone

Aggranite quartz engineered stone surfacing is extremely solid and non-porous, characterized by its resistance to scratching and staining, and its overall durability.

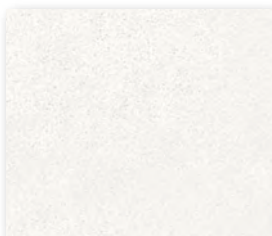

Your All Inclusive Source

Aggranite quartz engineered stone products are in compliance with the NSF standards for surfaces used in medical, laboratory and food-preparation facilities.

Ag•Gra•Nite™ Sinks

ABOUT **AG•Gra•NITE™** SINKS

Around 80% of the material used in Ag•Gra•Nite sinks is quartz, the hardest constituent of granite. Thus, they are referred to as composite quartz sinks. Over the past twenty years, the quartz composite sinks have achieved a highly acclaimed reputation as a premium product. More than one million of these sinks are sold each year throughout the world.

The materials used in Ag•Gra•Nite sinks are combined with high-grade acrylic to produce a hardened composite material which provides for the long life of the sinks, making them heat-resistant (over 530° F) and resistant to cracks and dirt.

Ag•Gra•Nite material benefits at a glance:

- Antibacterial qualities from natural silver ions
- Extremely easy to clean
- Food-safe
- Light-fast
- Scratch-resistant
- Dirt-resistant
- Shock-proof thanks to the very high quartz content

Textures

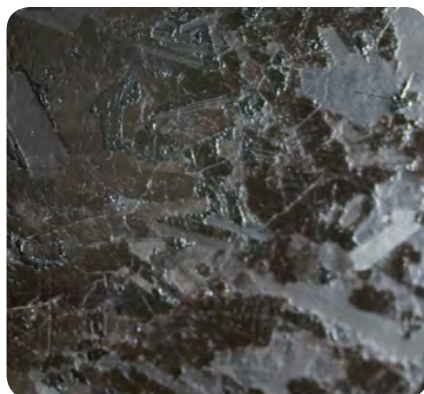

Polished

Honed

Antiqued

Carressed

Customize your granite by choosing a textured finish that reflects your own unique style.

A Polished Finish is a standard factory finish for most granites and marbles. It's glossy, highly reflective and the least porous of all texture finishes.

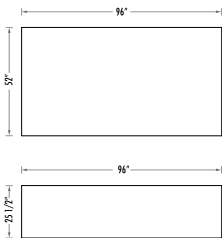

A Honed Finish gives granite a smooth, matte finish and mutes the color of the stone.

An Antique Finish is a honed finish with added texture. This process has a soft sheen but not as reflective as a polished finish.

A Caressed Finish is similar to the Antique finish, but has polished high spots. The end result is a finish with a high polish and rich, saturated color.
